

**We connect brands with people.
Our products create identity.**

JAMES & NICHOLSON AND MYRTLE BEACH BECOME DAIBER.

We will be continuing our two top brands **JAMES & NICHOLSON** and **myrtle beach** under the new **Daiber** label from January 2025. Daiber will continue to be backed by the proven producers and suppliers who are known for the highest standards and first-class materials. Thanks to this strong foundation, we will continue to offer the product quality, functionality and versatility that you know and can expect from us.

Daiber is your strong partner for the future. We will remain your point of contact for first-class corporate fashion that impresses with its value for money. All designs, materials and production standards meet the usual high requirements.

In the future: simply Daiber.

WE ARE DAIBER

Excellent appearances and a collective image are one thing. Creating a sense of belonging, a WE, is the other. We claim to be more than just a company in the field of corporate fashion. We connect brands with people.

We are a **manufacturer, consultant** and **long-term partner** for our customers, suppliers and employees. We maintain **fair dealings** with each other and beyond. This can be felt in **timeless designs** which everyone can wear, which can cope with all situations and which create connections between brands and people. Our products create identity.

Our **origin** and Swabian roots keep driving our inventive spirit and enable us to **continue developing in a future-oriented way**. Our aim is to combine our knowledge and actions as a **corporate-fashion platform**.

The joint management of Daiber is in the hands of **Kai Gminder**, in the fourth generation of the family, and **Christof Kunze**.

EMPLOYEE STATEMENTS

We have **international customers**, mainly throughout Europe, but also worldwide. From Switzerland or Italy to Australia and New Zealand.

Denise Kalenbach, export sales,
with Daiber since 2017

Apart from my dialect - the most Swabian thing about me is my **hands-on mentality**. And this is exactly the way I would describe Daiber. That is why I like it so much here.

André Knaus, head of digital operations,
with Daiber since 2022

What sets Daiber apart from other companies is among other things their **colour- and product diversity**. If our customers order something **today**, they will get it delivered **tomorrow**.

Felix Dräger, warehouse manager,
with Daiber since 2001

“

What I appreciate about Daiber is that despite our size we act as a **family-owned business**, which has become rare these days. The advantage is that we have short ways, it is very familiar. We have a lot of employees who have been with Daiber for many years; everyone knows the processes. **We are a close-knit team.**

Bernd Seeger, sales manager,
with Daiber since 2019

“

There is definitely **a lot of fashion** in our corporate fashion. It is used in a variety of ways in all areas, from trade to medicine. Daiber always looks for the right textiles and accessories to give our customers **the perfect appearance.**

Alicia Brunner, marketing student trainee,
with Daiber since 2021

“

When I embroider my patterns, I have to make sure that the person who wears it later **feels comfortable** in it. It has to be placed just right and embroidered neatly. There's no other way.

Filomena Amato, sample embroiderer in the
embroidery department, with Daiber since 1975

RESPONSIBILITY

Corporate fashion with a clear conscience

amfori 
Trade with purpose

Member of amfori, a leading global business
association for sustainable trade.
For more information visit www.amfori.org.

Social Compliance

Gustav Daiber GmbH is a long-standing member of the Business Social Compliance Initiative (amfori BSCI) and commits itself as well as its business partners and suppliers to socially responsible business practices. Accordingly, the corporate fashion products of Daiber are manufactured in compliance with the BSCI Code of Conduct.

This code includes, among other things, a clear commitment to the right of employees to freedom of association, protection against discrimination and appropriate remuneration, i.e. a living wage. This ensures humane and respectful treatment of suppliers along the value chain.

Furthermore, the UN Guiding Principles on Business and Human Rights apply, as well as the occupational safety regulations of the International Labour Organisation (ILO). Child labour, forced labour or precarious working conditions are not tolerated. Several independent inspection bodies in the production countries take care of the strict auditing of all factories and ensure compliance with these conditions.

Environmental protection

In addition to social standards, Daiber is also committed to improving environmental sustainability in its international supply chain. By introducing the amfori BEPI system of the Business Environmental Performance Initiative, for example, environmentally oriented services can be monitored and potential for improvement can be identified. This makes it possible to work together with long-standing suppliers to develop new approaches for more product responsibility and a more responsible value chain and to implement them in a targeted manner. For this purpose, the production sites receive special training measures for practical implementation, so that the impact on the environment is continuously reduced.

When manufacturing the products, too, care is taken to keep the environmental impact as low as possible. Thus all the products of Daiber are REACH-compliant, are certified OEKO-TEX® STANDARD 100 and Organic Content Standard (OCS) and thus meet high quality standards. In addition, sustainable materials such as organic cotton and recycled polyester are increasingly used.

99% of our suppliers are
amfori members

15+ years of partnership
with our suppliers.

OEKO-TEX® STANDARD 100

This standard guarantees that textile and non-textile product components pose no threat to health. The components of all the products of Daiber, i.e. also all threads, buttons and other accessories, are tested for harmful substances and pose no threat to health.

Complying with the REACH regulation

The REACH regulation is the European chemicals legislation on the registration, evaluation, authorisation and restriction of chemicals. All the products of Daiber are manufactured in compliance with REACH.

Quality Standard

The products are continually examined by certified testing institutes in the countries of production regarding the given parameters. Moreover, in cooperation with SGS, Testex, Hohenstein and other renowned institutes, the quality is continually controlled.

SUSTAINABILITY

For us, corporate responsibility also includes fair treatment of our environment, for example through innovative, durable collections made of **organic cotton and recycled polyester**. We are convinced that we can only grow together and move towards the future with courage – as we have been doing for more than 100 years.

Recycled Polyester

PET bottles are recycled to create a new fashion

Collected plastic bottles are crushed, melted down and spun to yarn again, which is sometimes completely integrated into the production. Thus for producing the workwear cap MB6234 about 3 half-litre bottles are recycled and for the new sport T-shirt JN519 even 25.

Organic Cotton Collection - Clothes with inner values

Fair, transparent, harmless: The Organic Cotton collection includes a wide range of sustainably produced organic cotton clothing for every fair fashion lover. The Organic Cotton collection by Daiber impresses with a high quality combined with modern cuts and tasteful details.

The naturalness is not only visible but also perceptible. Knowing that the components of the garment are made of sustainably grown cotton and that no genetically modified fibres are used conveys a completely new attitude towards life.

OCS Standard

In the production of Daiber textiles, the Organic Content Standard enables the exact proportion of organic material in a product to be recorded and tracked through the production chain. The supreme 'Content Claim Standard' defines, among other things, the traceability of goods and transparency in the production chain for the OCS.

CLIMATE NEUTRAL CATALOGUE

We assume responsibility for our climate.

This means that by supporting an international climate protection project by climatePartner, we compensate for the inevitable CO₂-emissions resulting from the printing of our catalogues.

Transparent climate protection

A certificate by ClimatePartner confirms our CO₂ compensation.

86,200 kg CO₂ — compensated for

Climate project + ocean protection

This combined project contributes to the financing of a certified climate project and additionally supports international ocean protection. For every tonne of CO₂ saved through the contribution via a certified climate project, 10 kg of plastic is collected in coastal regions. This intercepts plastic before it enters the sea and protects sensitive marine ecosystems.

Currently, ocean protection is combined with a certified cookstove project in India (climatepartner.com/1499). By using more efficient cookstoves, less firewood is needed, thus minimising deforestation.

Print product with financial
climate contribution

ClimatePartner.com/11061-2410-1001

Certified Climate Protection

With every sheet of recycled paper we improve our ecological footprint

Recycled paper protects forests, biodiversity and the climate and saves energy, water and CO₂ during production. For producing our this year's main catalogue, we are using 100% FSC certified recycled paper.

FSC Recycled

The FSC Recycled logo stands for products which contain only recycled paper.

The text in the logo reads: 'Product type made from recycled paper'.

Savings potential by using recycled paper

With each sheet of recycled paper, we improve our ecological footprint:

- Obtained from 100 % waste paper
- Saves 79 % water
- Saves 73 % energy
- Saves 42 % CO₂
- Certified by the FSC

**100 %

FUNCTIONS & FEATURES

EASY CARE

This special finish makes shirts and blouses especially easy to iron. To preserve this function the textiles should not be overdried in the tumbler and you should avoid using an overheated iron.

SOFTSHELL

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

NON IRON

This special finish makes shirts and blouses iron-free: All you have to do is wash them, dry them and put them on. To preserve this function, these textiles should not be overdried in the tumbler and you should avoid using an overheated iron. If necessary, seams can be ironed at a low temperature.

BIONIC-FINISH®ECO

BIONIC-FINISH® was developed, following the example set by nature, 'learning from nature'. The textile is protected against water and dirt by a very thin crystalline structure. BIONIC-FINISH®ECO protects man and nature.

BREATHABILITY / PERMEABILITY TO VAPOUR

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much steam in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

CAPS FOR PRINTING

Caps with this label are ideal for printing and embroidering. The construction of the caps leaves a lot of space so the cap is easy to decorate, with the logo presented to perfection.

WATER COLUMN

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

UPF 50+

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sun-screens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type.

TAPED SEAMS

To avoid moisture penetrating into the fabric, seams and stitches can get taped. Taped seams are 100 % water-proof.

COOLDRY®

Due to the CoolDry® finish moisture is transported to the outside and creates a comfortable feeling. The textiles dry quickly, are breathable and ideal for all activities.

LYCRA®

LYCRA® allows the fabric both to stretch significantly and to retain its shape. Fabrics and garments containing Lycra offer exceptional fit, comfort, freedom of movement and wrinkle recovery.

CORDURA®

CORDURA® is a very sturdy, textured polyamide fabric, which is extremely tear- and abrasion-proof. Special yarns, specially developed weaving techniques, dyeing methods and additional textile finishing ensure that products with CORDURA® can be used as durable and comfortable workwear.

THINSULATE™ INSULATION

The light-weight thermal insulation affords optimum protection against cold despite its minimum thickness. It even keeps you warm in damp or wet conditions. Thinsulate™ INSULATION offers excellent comfort and allows optimum room to move. It is extremely breathable, durable and easy-care.

COOLMAX®

Through the channels of the breathable COOLMAX®-fibre humidity is evacuated extremely fast to the outer layers of the fabric. Thus the body is kept dry. At the same time a natural temperature control of the body is supported.

SORONA®AURA

sorona®AURA fibers consist of 37% vegetable components, obtained from renewable raw materials. Garments with sorona® Aura offer an eco-friendly alternative with outstanding breathability, lightweight comfort and efficient heat retention. sorona®AURA offers the perfect mix of sustainability and performance.

SUGENRO® GRS INSULATION

Sugenro® GRS Insulation is an innovative premium insulation product made from 100% recycled PET-bottles. Modelled on down, Sugentro® GRS Insulation is a soft, high-quality filling with a low weight and outstanding properties in terms of thermal behaviour, durability and breathability. The GRS certification confirms compliance with the highest ecological and social standards. Sugentro® GRS Insulation helps to reduce waste and greenhouse gas emissions, conserve natural resources and promote a circular economy.

TOPCOOL®

TOPCOOL® polyester fibres perfectly absorb moisture due to their special surface and evacuate it quickly to the outside where it can evaporate. The skin stays comfortably dry and a constant temperature level of the body is maintained.

UPF 50 +

**Coming to grips with
the sun thanks to
workwear with certi-
fied UV-protection**

**98% Shielding
of UV-radiation**

SUN PROTECTION AT WORK

**Workwear with certified
UV-protection**

The more UPF, the better

The UPF (Ultraviolet Protection Factor) indicated on UV-protective clothing shows how much longer somebody wearing these clothes can stay in the sun without suffering any damage to health. Therefore, the UPF-indication on textiles corresponds to the sun protection factor of sunscreens. This is based on the self-protection time of the skin, which varies considerably depending on the individual skin type.

CORRECTLY ASSESSING THE RISK

People working outdoors

Many people work outdoors all day or part of the day. They have a much higher risk of contracting skin cancer than people working indoors. The same goes for leisure activities outdoors. The sun is your constant companion and supplies the vital vitamin D. But a lot of sun also means: headgear, sunscreen and UV-protective clothing.

UVA/UVB-rays

UV-radiation is especially strong in the months of April to September; from 11 a.m. to 4 p.m.

The dangers of UV-radiation

UV-RADIATION ALSO EXISTS WHEN THE SUN IS NOT SHINING

ALSO PENETRATES THE CLOUDS

EXISTS INDEPENDENT OF OUTDOOR TEMPERATURE

PENETRATES LOOSE TISSUE

IS REFLECTED BY SURFACES SUCH AS METAL, WATER, CONCRETE

UV-clothing provides better protection than sunscreen

The best protection against harmful UV-radiation is provided by certified UV-protective clothing. It shields off radiation, does not have to be applied once again like sunscreen and therefore lasts all day. For the parts of the body uncovered by clothes sunscreen with a high sun protection factor and a headgear should be used.

Australian/New Zealand Standard AS/NZS 4399:2017

The best-known and worldwide most common standard is the Australian-New Zealand standard. For checking the UV-protective factor according to AS/NZS 4399:2017, the UV-protection is established on a new and dry textile. For this purpose, the solar spectrum of Melbourne, Australia, is reproduced. Clothing marked with the Australian/New Zealand standard provides protection against UVA- and UVB-radiation of sunlight. A product marked with UPF 50+ according to this standard blocks more than 98% of the harmful UV-rays. The textiles protect the parts of the body covered by them.

Tested textile UV-protection

The LABTECH Prüfungsgesellschaft mbH is officially accredited according to DIN EN ISO/IEC 17025 2005 and based on this standard, they test as an independent laboratory the UV-protective factor of our textiles.

raw

SIZES, QUALITIES & CARE

Washing (tub)

The numbers in the tub indicate the maximum washing temperatures which must not be exceeded. The bar below the tub requires a more (mechanical) gentle treatment (e.g. programme for delicate fabrics). It designates washing programmes which are suitable for easy-care and delicate garments. Textiles made of cotton or mixed fibres should be pulled into shape when still wet. We recommend that textiles with prints or embroideries should only be washed on the reverse at a maximum of 40 degrees in order not to impair the quality of the print or embroidery.

Normal washing

Delicate washing

Normal washing

Delicate washing

Normal washing

Delicate washing

Specially delicate washing

Delicate washing

Hand washing

Dry Cleaning (cleaning Drum)

The letters are intended for the textile cleaner. They indicate the possible solvents. The bar below the circle requires cleaning under limited mechanical strain, with a limited amount of moisture and at a medium temperature. Textiles with prints or embroideries should not be dry cleaned.

Normal clothes

Delicate clothes

Delicate clothes

Ironing (iron)

The dots indicate the temperature scale of the irons. Textiles with prints or embroideries should only be ironed on the reverse.

Iron at high temperature
(max. 200 degrees)

Iron at medium temperature
(max. 150 degrees)

Iron at low temperature
(max. 110 degrees)

Do not iron

Bleaching (triangle)

This symbol shows the textile cleaner whether the garment may be bleached or not.

Chlorine bleaching possible

Do not bleach

Only oxygen bleaching
No chlorine bleaching

Tumble drying (Tumble-Drier)

The dots indicate the drying-grades of the tumble-drier. Textiles with transfer prints must not be tumble-dried.

Tumble dry at normal temperature

Do not tumble dry

Tumble dry at low temperature

INDEX- STICKERS

**Quickly
find
products**

For quickly finding our products, the small adhesive labels are the ideal help.

Just stick the labels to the desired product pages or use them as a complete index.

**Strip off the sticker, lightly pre-fold it
and attach it to the desired position.**

COLORS

Yellow

white off-white vanilla stone sand beige light-yellow sunny-lime acid-yellow fluo-yellow

Red

light-pink rose red-melange pink berry signal-red light-red neon-orange sunflower bright-yellow
